E EXAMINATION OF BIDS

25 Confidentiality

- 25.1 Information relating to the evaluation of bids shall not be disclosed to Bidders or any other persons not officially concerned with such process until information on Contract award is communicated to all Bidders.
- 25.2 Any attempt by a Bidder to influence improperly the Purchaser in the evaluation of the bids or Contract award decisions may result in the rejection of its bid.
- 25.3 Notwithstanding ITB 25.1, from the time of bid opening to the time of Contract award, if any Bidder wishes to contact the Purchaser on any matter related to the bidding process, it should do so in writing.

26 Clarification of Bids

- 26.1 To assist in the examination, evaluation, and comparison of the bids, and qualification of the Bidders, the Purchaser may, at its discretion, ask any Bidder for a clarification of its bid, allowing a reasonable time for response. Any clarification submitted by a Bidder that is not in response to a request by the Purchaser shall not be considered. The Purchaser's request for clarification and the response shall be in writing. No change in the prices or substance of the bid shall be sought, offered, or permitted.
- 26.2 If a Bidder does not provide clarifications of its bid by the date and time set in the Purchaser's request for clarification, its bid may be rejected.

27 Determination of Responsiveness

- 27.1 The Purchaser's determination of a bid's responsiveness is to be based on the contents of the bid itself, as defined in **ITB10**.
- 27.2 A substantially responsive bid is one that meets the requirements of the Bidding Document without material deviation, reservation, or omission.
- (a) "Deviation" is a departure from the requirements specified in the Bidding Document;
 - (b) "Reservation" is the setting of limiting conditions or withholding from complete acceptance of the requirements specified in the Bidding Document; and
 - (c) "Omission" is the failure to submit part or all of the information or documentation required in the Bidding

Document.

27.3A material deviation, reservation, or omission is one that,

(a) if accepted, would:

(i) affect in any substantial way the scope, quality, or performance of the Requirements as specified in Section VI; or

(ii) limit in any substantial way, inconsistent with the Bidding Document, the Purchaser's rights or the Bidder's obligations under the proposed Contract; or

(b) If rectified, would unfairly affect the competitive position of other Bidders presenting substantially responsive bids.

27.4 The Purchaser shall examine the technical aspects of the bid in particular, to confirm that all requirements of Section VI have been met without any material deviation, reservation, or omission.

27.5 If a bid is not substantially responsive to the requirements of the Bidding Document, it shall be rejected by the Purchaser and may not subsequently be made responsive by correction of the material deviation, reservation, or omission.

27.6 Provided that a bid is substantially responsive, the Purchaser may waive any quantifiable nonconformity in the bid that does not constitute a material deviation, reservation or omission.

27.7 Provided that a bid is substantially responsive, the Purchaser may request that the Bidder submit the necessary information or documentation, within a reasonable period of time, to rectify nonmaterial nonconformities in the bid related to documentation requirements. Requesting information or documentation on such nonconformities shall not be related to any aspect of the price of the bid. Failure of the Bidder to comply with the request may result in the rejection of its bid.

27.8 Provided that a bid is substantially responsive, the Purchaser shall rectify quantifiable nonmaterial nonconformities related to the Bid Price. To this effect, the Bid Price shall be adjusted, for comparison purposes only, to reflect the price of the non-conforming item or component. The adjustment shall be made using the methodology indicated in Section III, Evaluation and Qualification Criteria.

F BID EVALUATION AND COMPARISON

- 28 Correction of Arithmetical Errors**
- 28.1 The Purchaser shall use the criteria and methodologies indicated in Section III, Evaluation and Qualification Criteria. No other evaluation criteria or methodologies shall be permitted.
- 28.2 Provided that the bid is substantially responsive, the Purchaser shall not correct arithmetical errors as indicated in Section III, Evaluation and Qualification Criteria.
- 29 Conversion to Single Currency**
- 29.1 For evaluation and comparison purposes, the currency (ies) of the bid shall be converted into a single currency as specified in Section III, Evaluation and Qualification Criteria.
- 30 Bid Adjustments**
- 30.1 For evaluation and comparison purposes the Purchaser shall adjust the bid prices using the criteria and methodology specified in Section III. Evaluation and Qualification Criteria.
- 30.2 Unless otherwise specified in the BDS, no margin of domestic or regional preference shall apply. If a margin of preference applies, the application methodology shall be as specified in Section III, Evaluation and Qualification Criteria.
- 31 Qualification of the Bidder**
- 31.1 The Purchaser shall determine to its satisfaction whether the Bidder that is selected as having submitted the lowest evaluated and substantially responsive bid meets the qualifying criteria specified in Section III, Evaluation and Qualification Criteria.
- 31.2 The determination shall be based upon an examination of the documentary evidence of the Bidder's qualifications submitted by the Bidder, pursuant to ITB 15.
- 31.3 An affirmative determination shall be a prerequisite for award of the Contract to the Bidder. A negative determination shall result in disqualification of the bid, in which event the Purchaser shall proceed to the next lowest evaluated bid to make a similar determination of that Bidder's qualifications to perform satisfactorily.
- 31.4 The capabilities of the manufacturers and subcontractors proposed in its Bid to be used by the lowest evaluated Bidder for identified major items of the Requirements will also be evaluated for acceptability in accordance with the criteria and methodologies defined in Section III, Evaluation and Qualification Criteria. Their participation should be confirmed with a letter of intent between the parties, as needed. Should a manufacturer or subcontractor be determined to be unacceptable, the Bid will not be rejected, but the Bidder will be required to substitute an acceptable manufacturer or subcontractor without any change to the bid price.
- 32 Comparison**
- 32.1 Subject to ITB 28, 29 and 30, the purchase shall compare all

of Bids

substantially responsive bids to determine the lowest evaluated bid.

33 Purchaser's Right to Accept Any Bid, and to Reject Any or All Bids

33.1 The Purchaser reserves the right to accept or reject any bid, and to annul the bidding process and reject all bids at any time prior to contract award, without thereby incurring any liability to Bidders. In case of annulment, all bids submitted and specifically, bid securities, shall be promptly returned to the Bidders.

G AWARD OF CONTRACT

34 Award Criteria

34.1 Subject to ITB 33.1, the purchaser shall award the Contract to the Bidder whose offer has been determined to be the lowest evaluated bid and is substantially responsive to the Bidding Document, provided further that the Bidder is determined to be qualified to perform the Contract satisfactorily.

34.2 At the time the Contract is awarded, the Purchaser reserves the right to increase or decrease the quantity of Goods and Related Services originally specified in Section VI, Requirements, provided this does not exceed the percentages specified in the BDS, and without any change in the unit prices or other terms and conditions of the bid and the Bidding Document.

35 Notification of Award

35.1 Prior to the expiration of the period of bid validity, the Purchaser shall notify the successful Bidder, in writing, that its bid has been accepted. The notification letter (hereinafter and in the Conditions of Contract and Contract Forms called the "Letter of Acceptance") shall specify the sum that the Purchaser will pay the Supplier in consideration of the supply of the Goods and Related Services (hereinafter and in the Contract Forms called "the Contract Price").

35.2 Until a formal contract is prepared and executed, the notification of award shall constitute a binding Contract.

35.3 At the same time, the Purchaser shall also notify all other Bidders of the results of the bidding process, the unsuccessful bidders may request in writing to the Purchaser for a debriefing seeking explanations on the grounds on which their bids were not selected. The Purchaser shall promptly respond in writing to any unsuccessful Bidder who, after Publication of contract award, requests a debriefing.

36 Signing of Contract

36.1 Promptly upon notification, the Purchaser shall send the successful Bidder the Contract Agreement.

36.2 Within twenty-eight (28) days of receipt of the Contract Agreement, the successful Bidder shall sign, date, and return it to the Purchaser.

36.3 Upon the successful Bidder's furnishing of the signed Contract Agreement and Performance Security pursuant to ITB 37, the Purchaser will discharge its Bid Security, pursuant to ITB 18.

36.4 Notwithstanding ITB 36.2 above, in case signing of the Contract Agreement is prevented by any export restrictions attributable to the Purchaser, to the country of the Purchaser, or to the use of the products/goods, systems or services to be supplied, where such export restrictions arise from trade regulations from a country supplying those products/goods, systems or services, the Bidder shall not be bound by its bid, always provided, however, that the Bidder can demonstrate to the satisfaction of the Purchaser that signing of the Contract Agreement has not been prevented by any lack of diligence on the part of the Bidder in completing any formalities, including applying for permits, authorizations and licenses necessary for the export of the products/goods, systems or services under the terms of the Contract Agreement.

37 Performance Security

38 Within twenty-eight (28) days of the receipt of notification of award from the Purchaser, the successful Bidder shall furnish the performance security in accordance with the conditions of contract, using for that purpose the Performance Security Form included in Section IX, Contract Forms, or another form acceptable to the Purchaser. If the performance security furnished by the successful Bidder is in the form of a bond, it shall be issued by a bonding or insurance company that has been determined by the successful Bidder to be acceptable to the Purchaser. A foreign institution providing a bond shall have a correspondent financial institution located in the Purchaser's Country.

Failure of the successful Bidder to submit the above-mentioned Performance Security or sign the Contract shall constitute sufficient grounds for the annulment of the award and forfeiture of the bid security, or execution of the Bid-Securing Declaration. In that event the Purchaser may award the Contract to the next lowest evaluated Bidder whose offer is substantially responsive and is determined by the Purchaser to be qualified to perform the Contract satisfactorily.

PRICE ADJUSTMENT FORMULA (N/A)

Where, pursuant to **ITB** 13.7 and GC 10.1, Prices shall be adjustable during the performance of the Contract, the following method shall be used to calculate the price adjustment:

Prices payable to the Supplier, as provided for at **ITB** 13.7 and GC 10.1, shall be subject to adjustment during performance of the Contract, to reflect changes in the cost of labour and material components in accordance with the formula:

$$P_1 = P_0 (a + \frac{bL_1}{L_0} + \frac{cM_1}{M_0}) - P_0$$

$$a+b+c = 1$$

In which:

- P₁** = adjustment amount payable to the Supplier.
P₀ = Contract Price (base price).
a = fixed element representing profits and overheads included in the Contract Price and generally in the range of five (5) to fifteen (15) percent.
b = estimated percentage of labour component in the Contract Price.
c = estimated percentage of material component in the Contract Price.
L₀, L₁ = labour indices applicable to the appropriate industry in the country of origin on the base date and date for adjustment, respectively.
M₀, M₁ = material indices for the major raw material on the base date and date for adjustment, respectively, in the country of origin.

The coefficients **a**, **b**, and **c** as specified by the Purchaser are as follows:

- a** = *[insert value of coefficient]*
b = *[insert value of coefficient]*
c = *[insert value of coefficient]*

The Bidder shall indicate the source of the indices and the base date indices in its bid.

Base date = twenty-eight (28) days prior to the deadline for submission of the bids.

Date of adjustment = *[insert number of weeks]* weeks prior to date of shipment (representing the mid-point of the period of manufacture).

The above price adjustment formula shall be invoked by either party subject to the following further conditions:

- (a) No price adjustment shall be allowed beyond the original delivery dates unless specifically stated in the extension letter. As a rule, no price adjustment shall be allowed for periods of delay for which the Supplier is entirely responsible. The Purchaser will, however, be entitled to any decrease in the prices of the Goods and Related Services subject to adjustment.
- (b) If the currency in which the Contract Price **P₀** is expressed is different from the currency of origin of the labour and material indices, a correction factor will be applied to avoid incorrect

adjustments of the Contract Price. The correction factor shall correspond to the ratio of exchange rates between the two currencies on the base date and the date for adjustment as defined above.

- (c) No price adjustment shall be payable on the portion of the Contract Price paid to the Supplier as advance payment.

3.0 TECHNICAL SPECIFICATIONS

SUPPLY AND DELIVERY OF A VEHICLE MOUNTED FLUSHING UNIT

GENERAL

1. These specification describes the basic requirements of goods. Tenderers are requested to submit with their offers the detail specifications, drawings, catalogues, etc. for the products they intend to supply.
 2. Tenderers must indicate on the specifications sheets whether the equipment offered comply with each specified requirement.
 3. All the dimensions and capacities of the equipment to be supplied shall not be less than those required in these specifications. Deviations from the basic requirements, if any, shall be explained in details in writing with the offer, with supporting data such as calculation sheets, etc. the procuring entity reserves the right to reject the products, if such deviations shall be found critical to the use and operation of the products.
- 4 The Tenderers are requested to present information along with their offers as follows:
- (i) Information on proper representative and/or workshop for back-up services/repair and maintenance including their names and addresses

Equipment Description

1. Function

This equipment is a vehicle mounted super structure unit with secondary drive unit that is operated in the same manner as for any gear shifting capable of carrying out the following tasks.

- (i) Rinsing of pipelines, drainage pipes, household connections, small and large canals and clearing of small and large sewerage lines.
- (ii) Suction of sludge, soiling and residual from pits, canals, grease separators, tanks and industrial rooms.
- (iii) Cleaning and spraying of canal covers, strainer baskets, separators, pits, tanks, concrete surfaces and all accessible surfaces that can be cleaned with a high-pressure jet spraying systems.
- (iv) Clearing of incrustations, cutting of roots in canals or drainage/sewerage systems using corresponding compressed water tools.

2. Construction

- (i) Chassis

The superstructure is mounted on a series production chassis capable of carrying min.5,000-water litre tank, high-pressure pump, vacuum pump, hydraulic pump, a hose reel drum mounted at the back of the tank complete with hydraulic motor drive unit, 120-metre (split into 60 metres) long high-pressure hose and the associated accessories. The total weight being within the specified framework of permissible axle loads according to Government of Kenya Traffic Act.

3. Equipment Systems

3.1 The equipment should have the following working system: -

(i) High pressure rinsing system.

The system consists mainly of a water tank, high-pressure pump capable of developing a minimum pressure 165bars, high-pressure hoses as well as various fittings. The water tank is filled by means of hydrant connections. The filling level must be checked by means of an inspection window.

The high-pressure pump is laterally to a support frame and driven by a properly/suitably rated close coupled hydraulic motor. The hydraulic motor will be driven by a suitable hydraulic pump mounted on the prime mover engine.

The water pressure will be adjusted by means of a control valve and be checked by a manometer located at the rear operator stand. This is also where the (RPM) revolutions per minute can be monitored and adjusted.

A rotating sewer line rinsing hose drum is mounted on the drain flap on the sludge chamber. The drum will be designed to carry a 120-meter high pressure hose of DN20 with an automatic hose winding system.

A hand operated spray gun or nozzle with full atomizoly jet for unclogging of conduits and canals; hose reel will also be located on the rear right hand side of the vehicle. The hose reel will be 60m high pressure pipe of DN13.

3.2 Tank suction and evacuation system with safety accessories.

The suction tank will be operated on the basis of the vacuum principle. The necessary operating vacuum pressure will be created by means of a rotary vacuum pump, which can also function as a pressure pump by switching the multiple slide gate valves. An excess pressure valve will be integrated to protect the tank against excess pressure. This valve will be adjusted to 0.5-bar, which means the valve is actuated as soon as this pressure is reached. An electro-pneumatic turning switch is to be installed at the operators stand to help operate the multipurpose slide gate valve.

An overfilling prevention unit is to be built into the tank crown to protect the vacuum pump from excessive suction. This will be in the form of a float ball on line with the vacuum pump.

The same type of float ball will be included in the safety pot as additional safety device to protect the vacuum pump against soiling and water in case the overfilling prevention unit is clogged or tightly sealed. A preliminary suction filter is installed in a position prior to entry of the line into the vacuum pump as a third safety device.

The flow of exhaust air of the vacuum pump will be conveyed into the open through an exhaust muffler and oil separator. The vacuum pump will be water cooled by means of a water cooler with an electric fan as well as a circulation pump.

3.3 Tank draining system

The tank will be drained using several different methods depending on the viscosity of the medium.

(a) Water and light sludge will be drained by gravity through the rear drain flap.

(b) Low viscosity materials will be drained by means of a pressure cushion of approx. 0.2 to 0.3 bar of excess pressure.

- (c) Draining of solid and sediment materials will be done by tilting the tank at the rear by means of the hydraulic system with the rear drain flap open.
- (d) The tank construction will be fabricated from a 6mm (minimum) thick plate and be a cylindrical steel container with convex floors and solid door. The partitioning, head and rear of the tank will be fabricated from an 8mm (minimum) thick plate. It will rest on a hot galvanized sub frame. The total volume will be 9,000L but partitioned into two compartments.

One compartment will carry sludge waste-water (4,000L) pumped through the vacuum pump while the other will be clean water filled through the water distribution hydrant system (5,000L)

The tank will also have an overfilling prevention unit, inspection windows, safety equipment and door seals.

The painting on the inside will include sand blasting, crossed coats of primer, coatings of bitumen resins for protection against corrosion and rust. Outside sand blasting crossed coats of primer, epoxy synthetic enamel final paint.

2No. Beacon lights will be fixed at the rear end of the tank and the other one on the front cabin.

The tank door should be hydraulically operated and suspended on hinges so that it opens upwards. The sealed tightness of the door will be achieved by a special profile seal in connection with mushroom head anchor screws.

4. Installation of parts on superstructure

All components that will not be attached to the superstructure will be delivered with a separate delivery note.

4.1 Anchoring the compressor

The site chosen for installation of the high-pressure pump vacuum pump in the vehicle should be easily accessible and safe from falling objects or side objects as it is transported to site. Sufficient room should be available for the connection of the pressure and suction piping.

4.2 Drive

The drive for the high pressure pump and vacuum pump will be Hydraulic Motors. A suitable hydraulic pump will be fitted on the prime mover's engine to provide hydraulic at high pressure to the motors.

4.3 Alignment

The drives must correspond with the arrows on the pumps and must be in exact alignment.

4.4 Piping

Stud bolts will be provided to fit welded neck flanges according to standards in the country. These standards should be applicable locally for ease of spares sourcing. The pipes used should have a non-corrosive inner surface.

The suction pipe must rise towards the pump. At its lowest point, a condensation trap with a drain cock should be fitted. If no provisions are made to allow condensation to drain off, the water will enter the compressor vacuum pump and cause a sudden surge when the machine is started thereby fracturing the rotor or the vanes. Pipe sizing should be done by putting into consideration factors like flow, erosion, acceleration head and pressure losses.

4.5 Mechanical contamination prevention filter

The filter should be vacuum tight and should be installed in the suction pipe. Attention should be paid to the direction of flow. It should also be easily accessible for cleaning and demounting.

4.6 Air inlet valve

It should be placed firmly in suction pipe as in 4.5.

4.7 Air outlet valve

The non-return valves will be firmly fitted on the outlet valve. The valve should close automatically after the pump stops. It should be placed between the pressure stud and the connection line with the direction of flow well marked on the valve housing.

4.8 Outlet piping

The pressure pipe must compensate thermal stress without any direction strain being imposed upon the discharge flange. At the lowest point, a condensation trap with drain cock will be fitted.

4.9 Thermometer

For the control of the compression temperature along the exhaust line, a threaded sleeve of ½” (inch) must be mounted.

4.10 Safety valve

Regulations for prevention of accidents dictates that a non-closable safety valve be installed on the pressure line. The valve will be required to maintain and disallow pressure from exceeding by 10% (percent).

It must also be capable of releasing all the entire compressed air delivered by the compressor.

It must also precede all other fittings on the delivery side.

The valve will be secured in a position out of normal reach to prevent any accidental alterations of the pressure setting.

4.11 Silencer

The whistling sound produced by the compressor will be effectively reduced with a silencer fitted as near as possible to the exit port. This will avoid reverberations in the pressure line.

It should also be installed in a way that the condensation outlets are easily accessed.

4.12 Water cooler

The water pump and radiator will be installed in an easily accessible position. The cooler should run the system at a temperature lower than 60⁰ (degrees).

5. Inspection of Equipment at point of manufacture before shipment/freight to the purchaser

5.10 The equipment will be subjected to inspection and testing by Nakuru Water Company Technical officials at point of manufacture to confirm adherence to specifications before shipment or freight to the purchaser at the bidders' cost

6. Supply Essential of parts as listed in Specifications and BOQ

6.10 The equipment will be supplied together with essential spare parts as listed in the Specifications and BOQ-**The bidder is also be allowed to add any other spares that are essential according to the design of the equipment provided in the bid and not in the provided list, as part of bid.**

21.1 The Supplier warrants that all the Goods are new, unused, and of the most recent or current models, and that they incorporate all recent improvements in design and materials, unless provided otherwise in the Contract.

21.2 Subject to **GC** Clause 15.2, the Supplier further warrants that the Goods shall be free from defects arising from any act or omission of the Supplier or arising from design, materials, and workmanship, under normal use in the conditions prevailing in the country of final destination.

21.3 Unless otherwise specified in the **PC**, the warranty shall remain valid for twelve (12) months after the Goods, or any portion thereof as the case may be, have been delivered to and accepted at the final destination indicated in the **PC**, or for eighteen (18) months after the date of shipment, from the port, or place of loading in the country of origin, whichever period concludes earlier.

21.4 The Purchaser shall give notice to the Supplier stating the nature of any such defects together with all available evidence thereof, promptly following the discovery thereof. The Purchaser shall afford all reasonable opportunity for the Supplier to inspect such defects.

21.5 Upon receipt of such notice, the Supplier shall, within the period specified in the **PC**, expeditiously repair or replace the defective Goods or parts thereof, at no cost to the Purchaser.

21.6 If having been notified, the Supplier fails to remedy the defect within the period specified in the **PC**, the Purchaser may proceed to take within a reasonable period such remedial action as may be necessary, at the Supplier's risk and expense and without prejudice to any other rights which the Purchaser may have against the Supplier under the Contract

22. **Patent Indemnity**

- 22.1 The Supplier shall, subject to the Purchaser's compliance with GC Clause 22.2, indemnify and hold harmless the Purchaser and its employees and officers from and against any and all suits, actions or administrative proceedings, claims, demands, losses, damages, costs, and expenses of any nature, including attorney's fees and expenses, which the Purchaser may suffer as a result of any infringement or alleged infringement of any patent, utility model, registered design, trademark, copyright, or other intellectual property right registered or otherwise existing at the date of the Contract by reason of:
- (a) The installation of the Goods by the Supplier or the use of the Goods in the country where the Site is located; and
 - (b) The sale in any country of the products produced by the Goods.
- Such indemnity shall not cover any use of the Goods or any part thereof other than for the purpose indicated by or to be reasonably inferred from the Contract, neither any infringement resulting from the use of the Goods or any part thereof, or any products produced thereby in association or combination with any other equipment, plant, or materials not supplied by the Supplier, pursuant to the Contract.
- 22.2 If any proceedings are brought or any claim is made against the Purchaser arising out of the matters referred to in GC Clause 22.1, the Purchaser shall promptly give the Supplier a notice thereof, and the Supplier may at its own expense and in the Purchaser's name conduct such proceedings or claim and any negotiations for the settlement of any such proceedings or claim.
- 22.3 If the Supplier fails to notify the Purchaser within twenty-eight (28) days after receipt of such notice that it intends to conduct any such proceedings or claim, then the Purchaser shall be free to conduct the same on its own behalf.
- 22.4 The Purchaser shall, at the Supplier's request, afford all available assistance to the Supplier in conducting such proceedings or claim, and shall be reimbursed by the Supplier for all reasonable expenses incurred in so doing.
- 22.5 The Purchaser shall indemnify and hold harmless the Supplier and its employees, officers, and Subcontractors from and against any and all suits, actions or administrative proceedings, claims, demands, losses, damages, costs, and expenses of any nature, including attorney's fees and expenses, which the Supplier may suffer as a result of any infringement or alleged infringement of any patent, utility model, registered design, trademark, copyright, or other intellectual property right registered or otherwise existing at the date of the Contract arising out of or in connection with any design, data, drawing, specification, or other documents or materials provided or designed by or on behalf of the Purchaser

23. **Limitation of Liability**

- 23.1 Except in cases of *gross negligence* or willful misconduct:
- (a) the Supplier shall not be liable to the Purchaser, whether in contract, tort, or otherwise, for any indirect or consequential loss or damage, loss of use, loss of production, or loss of profits or interest costs, provided that this exclusion shall not apply to any obligation of the Supplier to pay liquidated damages to the Purchaser; and
 - (b) the aggregate liability of the Supplier to the Purchaser, whether under the Contract, in tort, or otherwise, shall not exceed the Contract Price, provided that this limitation shall not apply to the cost of repairing or replacing defective equipment, or to any obligation of the Supplier to indemnify the Purchaser with respect to patent infringement.

24. **Change in Laws and Regulations**

- 24.1 If, within less than twenty-eight (28) days prior to the date of Bid Submission, any law, regulation, ordinance, order or bylaw having the force of law is enacted, promulgated, abrogated, or changed in the place of the Purchaser's country where the Site is located (which shall be deemed to include any change in interpretation or application by the competent authorities) that subsequently affects the Delivery Date and/or the Contract Price, then such Delivery Date and/or Contract Price shall be correspondingly increased or decreased, to the extent that the Supplier has thereby been affected in the performance of any of its obligations under the Contract. Notwithstanding the foregoing, such additional or reduced cost shall not be separately paid or credited if the same has already been accounted for in the price adjustment provisions where applicable, in accordance with GC Clause 10.

25. **Force Majeure**

- 25.1 The Supplier shall not be liable for forfeiture of its performance security, liquidated damages, or termination for default if and to the extent that its delay in performance or other failure to perform its obligations under the Contract is the result of an event of Force Majeure.

- 25.2 For purposes of this Clause, "Force Majeure" means an event or situation beyond the control of the Supplier that is not foreseeable, is unavoidable, and its origin is not due to negligence or lack of care on the part of the Supplier. Such events may include, but not be limited to, acts of the Purchaser in its sovereign capacity, wars or revolutions, fires, floods, epidemics, quarantine restrictions, and freight embargoes.

- 25.3 If a Force Majeure situation arises, the Supplier shall promptly notify the Purchaser in writing of such condition and the cause thereof. Unless otherwise directed by the Purchaser in writing, the Supplier shall continue to perform its obligations under the Contract as far as is reasonably practical, and shall seek all reasonable alternative means for performance not prevented by the Force Majeure event.

26. **Change Orders and Contract Amendments**

- 26.1 The Purchaser may at any time order the Supplier through notice in accordance GC Clause 5, to make changes within the general scope of the Contract in any one or more of the following:
- (a) drawings, designs, or specifications, where Goods to be furnished under the Contract are to be specifically manufactured for the Purchaser;
 - (b) the method of shipment or packing;
 - (c) the place of delivery; and
 - (d) The Related Services to be provided by the Supplier.
- 26.2 If any such change causes an increase or decrease in the cost of, or the time required for, the Supplier's performance of any provisions under the Contract, an equitable adjustment shall be made in the Contract Price or in the Delivery/Completion Schedule, or both, and the Contract shall accordingly be amended. Any claims by the Supplier for adjustment under this Clause must be asserted within twenty-eight (28) days from the date of the Supplier's receipt of the Purchaser's change order.
- 26.3 Prices to be charged by the Supplier for any Related Services that might be needed but which were not included in the Contract shall be agreed upon in advance by the Parties and shall not exceed the prevailing rates charged to other Parties by the Supplier for similar services.
- 26.4 Subject to the above, no variation in, or modification of, the terms of the Contract shall be made except by written agreement signed by the Parties.
- 27 **Extensions of Time**
- 27.1 If at any time during performance of the Contract, the Supplier or its subcontractors should encounter conditions impeding timely delivery of the Goods or completion of Related Services pursuant to GC Clause 8, the Supplier shall promptly notify the Purchaser in writing of the delay, its likely duration, and its cause. As soon as practicable after receipt of the Supplier's notice, the Purchaser shall evaluate the situation and may at its discretion extend the Supplier's time for performance, in which case the extension shall be ratified by the Parties by amendment of the Contract.
- 27.2 Except in case of Force Majeure, as provided under GC Clause 25, a delay by the Supplier in the performance of its Delivery and Completion obligations shall render the Supplier liable to the imposition of liquidated damages pursuant to GC Clause 20, unless an extension of time is agreed upon, pursuant to GC Clause 27.1.
28. **Termination**
Termination for Default

28.1 The Purchaser, without prejudice to any other remedy for breach of Contract, by written notice of default sent to the Supplier, may terminate the Contract in whole or in part:

- (i) If the Supplier fails to deliver any or all of the Goods within the period specified in the Contract, or within any extension thereof granted by the Purchaser pursuant to GC Clause 27;
- (ii) If the Supplier fails to perform any other obligation under the Contract; or
- (iii) If the Supplier, in the judgment of the Purchaser, has engaged in fraud and corruption, as defined in GC Clause 3, in competing for, or in executing the Contract.

28.2 In the event the Purchaser terminates the Contract in whole or in part, pursuant to GC Clause 28.1, the Purchaser may procure, upon such terms and in such manner as it deems appropriate, Goods or Related Services similar to those undelivered or not performed, and the Supplier shall be liable to the Purchaser for any additional costs for such similar Goods or Related Services. However, the Supplier shall continue performance of the Contract to the extent not terminated.

Termination for Insolvency

28.3 The Purchaser may at any time terminate the Contract by giving notice to the Supplier if the Supplier becomes bankrupt or otherwise insolvent. In such event, termination will be without compensation to the Supplier, provided that such termination will not prejudice or affect any right of action or remedy that has accrued or will accrue thereafter to the Purchaser.

Termination for Convenience

28.4 (a) The Purchaser, by notice sent to the Supplier, may terminate the Contract, in whole or in part, at any time for its convenience. The notice of termination shall specify that termination is for the Purchaser's convenience, the extent to which performance of the Supplier under the Contract is terminated, and the date upon which such termination becomes effective.

28.5 (b) The Goods that are complete and ready for shipment within twenty-eight (28) days after the Supplier's receipt of notice of termination shall be accepted by the Purchaser at the Contract terms and prices. For the remaining Goods, the Purchaser may elect:

- (i) To have any portion completed and delivered at the Contract terms and prices; and/or
- (ii) To cancel the remainder and pay to the Supplier an agreed amount for partially completed Goods and Related Services and for materials and parts previously procured by the Supplier.

29. **Export Restrictions**

29.1 Notwithstanding any obligation under the Contract to complete all export formalities, any export restrictions attributable to the Purchaser, to the country of the Purchaser, or to the use of the goods or services to be supplied, which arise from trade regulations from a country supplying those goods, or services, and which substantially impede the Supplier from meeting its obligations under the Contract, shall release the Supplier from the obligation to provide deliveries or services, always provided, however, that the Supplier can demonstrate to the satisfactions of the Purchaser that it has completed all formalities in a timely manner, including applying for permits, authorizations, and licenses necessary for the delivery of the goods or services under the terms of the Contract.

Price Adjustment Formula (N/A)

Where, pursuant to **ITB** 14.7 and GC 10.1, Prices shall be adjustable during the performance of the Contract, the following method shall be used to calculate the price adjustment:

Prices payable to the Supplier, as provided for at **ITB** 14.7 and GC 10.1, shall be subject to adjustment during performance of the Contract, to reflect changes in the cost of labour and material components in accordance with the formula:

$$P_1 = P_0 (a + \frac{bL_1}{L_0} + \frac{cM_1}{M_0}) - P_0$$

$$a+b+c = 1$$

in which:

- P₁** = adjustment amount payable to the Supplier.
- P₀** = Contract Price (base price).
- a** = fixed element representing profits and overheads included in the Contract Price and generally in the range of five (5) to fifteen (15) percent.
- b** = estimated percentage of labour component in the Contract Price.
- c** = estimated percentage of material component in the Contract Price.
- L₀, L₁** = labour indices applicable to the appropriate industry in the country of origin on the base date and date for adjustment, respectively.
- M₀, M₁** = material indices for the major raw material on the base date and date for adjustment, respectively, in the country of origin.

The coefficients **a**, **b**, and **c** as specified by the Purchaser are as follows:

- a** = *[insert value of coefficient]*
- b** = *[insert value of coefficient]*
- c** = *[insert value of coefficient]*

The Bidder shall indicate the source of the indices and the base date indices in its bid.

Base date = twenty-eight (28) days prior to the deadline for submission of the bids.

Date of adjustment = *[insert number of weeks]* weeks prior to date of shipment (representing the mid-point of the period of manufacture).

The above price adjustment formula shall be invoked by either party subject to the following further conditions:

- (a) No price adjustment shall be allowed beyond the original delivery dates unless specifically stated in the extension letter. As a rule, no price adjustment shall be allowed for periods of delay for which the Supplier is entirely responsible. The Purchaser will, however, be entitled to any decrease in the prices of the Goods and Related Services subject to adjustment.
- (b) If the currency in which the Contract Price P_0 is expressed is different from the currency of origin of the labour and material indices, a correction factor will be applied to avoid incorrect adjustments of the Contract Price. The correction factor shall correspond to the ratio of exchange rates between the two currencies on the base date and the date for adjustment as defined above.
- (c) No price adjustment shall be payable on the portion of the Contract Price paid to the Supplier as advance payment.
